Touch Pad Basics

Single-clicking or Clicking

Tap the touchpad once with your finger to select an item.

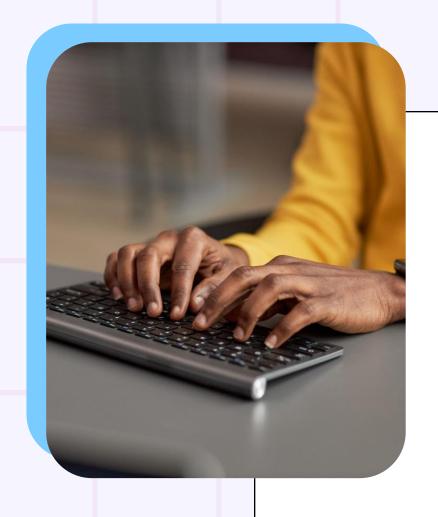

Double-clicking

Quickly tap the touchpad twice to open files or programs.

Right-clicking

Tap with two fingers simultaneously or press the bottom-right corner of the touchpad to simulate a right-click for additional options.

Basics of Using a Computer

Keyboard Basics

Basics of Using a Computer

Keyboard Basics

Typing

Use the keyboard to type letters (A-Z), numbers (0-9), and special characters.

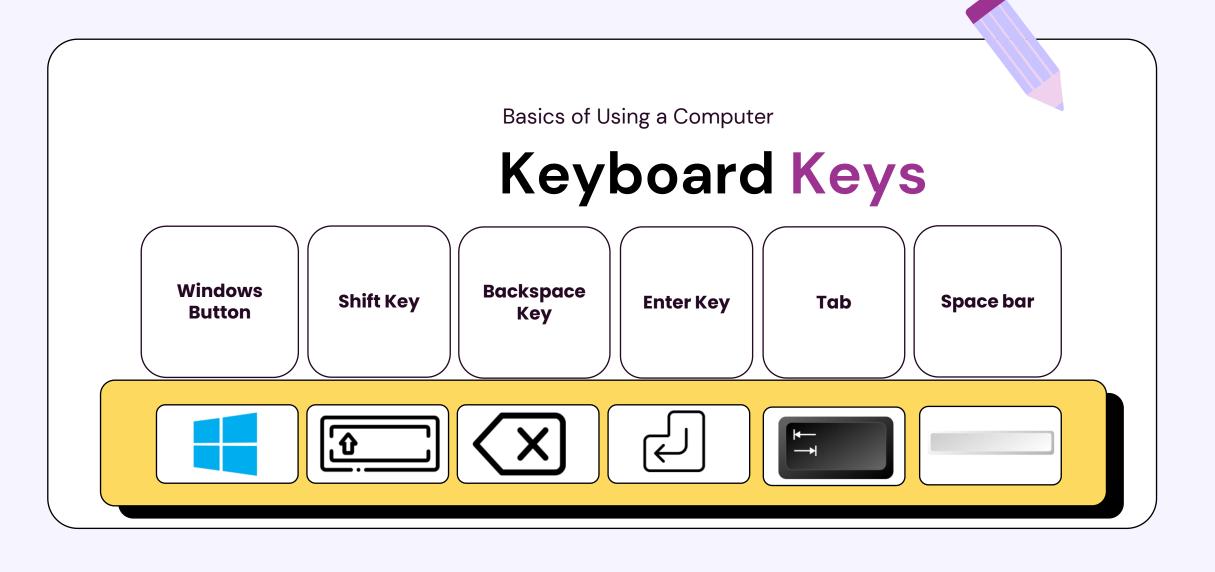

Enter Key

Press Enter to start a new line of text or confirm an action.

Backspace key

Use Backspace to delete the character to the left of the cursor.

Alphanumeric Keys

A-Z: Letters used for typing text.

0-9: Numbers used for numerical input.

Spacebar: Adds a space between words or characters.

Enter/Return: Executes commands, starts a new line in

Word processing.

Backspace: Deletes the character to the left of the cursor.

Tab: Moves the cursor to the next tab stop; commonly

used to create indents in text.

Modifier Keys

Shift: Capitalizes letters and accesses the upper

symbols on number keys.

Caps Lock: Toggles capitalization for all letter keys.

Ctrl (Control): Used in combination with other keys for shortcuts

(e.g., Ctrl+C for copy).

Alt (Alternate): Used for special functions and shortcuts (e.g.,

Alt+Tab to switch between open applications).

Function Keys (F1 –F12)

F1: Often opens the help menu in applications.

F2: Renames selected file or folder in Windows.

F3: Opens the search feature in many applications.

F4: Opens the search feature in many applications.

F5: Refreshes the page or document in browsers and

some applications.

F6-F12: Various functions, often customizable or specific

to software.

Navigation Keys

Arrow Keys

(Up, Down, Left, Right): Move the cursor or selection in the

direction of the arrow.

Home: Moves the cursor to the beginning of the

line or document.

End: Moves the cursor to the end of the line or

document.

Page Up: Scrolls up one page in a document.

Page Down: Scrolls down one page in a document.

Editing Keys

Insert: Toggles between insert mode (inserting text at

the cursor) and overwrite mode (replacing text

at the cursor).

Delete: Removes the character to the right of the cursor.

Print Screen (PrtScn):

Captures the entire screen and copies it to the

clipboard (useful for screenshots).

Special Keys

Escape (Esc):

Cancels the current operation or exits menus.

Windows Key (WinKey): Opens the Start menu in Windows.

Fn (Function):

Used on laptops to access secondary functions of other keys (e.g., adjusting screen brightness, volume).

Numeric Keyboard

1 2 3

(4) (5) (6)

7 (j) 9 (m)

Enter	Executes commands or calculates formulas.
0 - 9	Number input.
+ (Plus)	Addition.
- (Minus)	Subtraction.
/ (Slash)	Division.
* (Asterisk)	Multiplication.

Common Keypad Shortcuts

Windows Shortcuts

Ctrl + C Copy selected text or item

Ctrl + X Cut selected text or item.

Ctrl + V Paste copied or cut text or item.

Ctrl + Z Undo the last action.

Ctrl + Y Redo the last undone action.

Ctrl + A Select all text or items in the current

window.

Ctrl + S Save the current document or file.

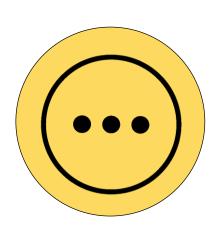

Alt + Tab Switch between open applications.

WinKey + D Show the desktop.

Ctrl + P Print the current document or page.

Tips

Tips for Effective Typing

Use Home Row Keys

Place your fingers on the home row (ASDF for the left hand, JKL; for the right hand) to type efficiently.

Touch Typing

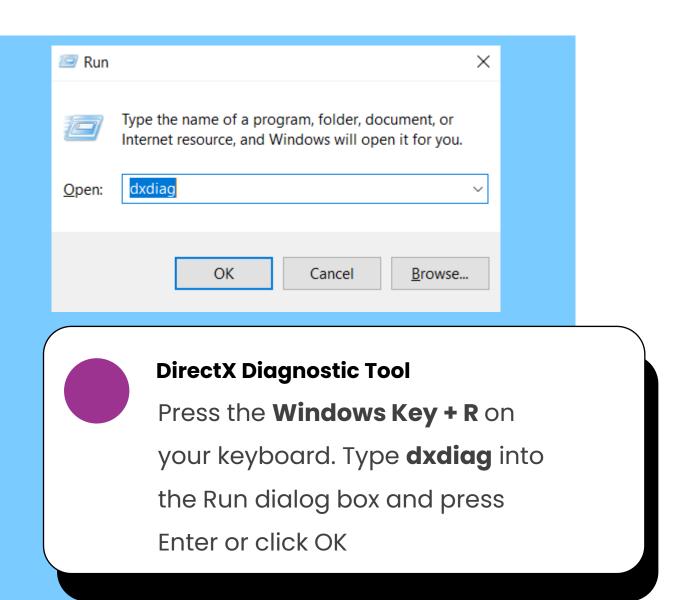

Practice typing without looking at the keyboard to increase speed and accuracy.

Regular Practice

Consistent practice helps improve muscle memory and typing speed.
